EXPERIENCE

Web Developer as Freelancer/Consultant/Open Source Contributor/Volunteer/Intern

Fullstack Web Developer
NextToEdit Tech Solutions

Sep 2023 - Present
As a freelance web developer at RiotGrrrlTech Solutions, I specialize in helping non-profits, start-ups, and scaling companies enhance their digital presence. My focus is on creating handcrafted applications that prioritize SEO optimization and web accessibility, ensuring an inclusive online experience.

Key Services:
- Fullstack Development
- SEO Optimization
- Accessibility Compliance, Audits and Training

I work closely with clients to develop tailored web solutions that align with their business objectives and user requirements. Specializing in taking projects from concept to completion, I engage in every stage of the web development process. My service includes every step from initial client consultations to understand their vision and requirements, crafting user-friendly designs and interfaces, developing the frontend using modern technologies like React, managing backend services and databases, testing and setting up domain for the client. I provide full service package including training with the client using (headless) CMS for seamless content managing and continues support. My role ensures a cohesive and efficient workflow, delivering end-to-end solutions that are scalable, performant, and aligned with the client's goals.

Frontend Developer

DAYA

Nov 2023 - Present

As a Frontend Development Intern at Daya Innovation Team, I am actively engaged in the heart of
FemTech innovation, contributing technical expertise and coding skills to the creation and
development
of innovative FemTech solutions and at the same time also supporting the company's mission to foster
female entrepreneurship and sustainability through open innovation and deep technology.

Volunteer at Zetkin Foundation

React, Typescript, Open Source, Next.js

Contribute to improving usability and accessibility of Zetkin Foundation's codebase, focusing on
optimizing user experience and ensuring inclusive design principles.

Co-funder and board member of tequeenmatch, 2023

Startup, SAS, Fullstack Development, Marketing, Strategy, Business Planning, Fundraising

Initialized as a co-project during my bootcamp at Technigo, where we developed a match-making
application connecting underrepresented groups within the tech-community as mentors and
mentees. We are currently running teQueenMatch as a non-profit organization aiming to build
community and raise fundings and resources continuing the process building the app and scale the
project further.

Previous Career

Executive Coordinator

Popkollo

Oct 2016 - Sep 2020 (4 years)

In my role as a coordinator, my primary responsibility was to ensure that all 16 camp organizers had
the necessary resources to smoothly conduct their camps and activities. This encompassed
extensive digital communication and administrative support, alongside organizing and facilitating
meet-ups, supplying educational materials, creating and maintaining digital resources for camp
structures, and assisting in the recruitment of music leaders and guest artists. Throughout the years, I
have achieved quantifiable outcomes in terms of community growth and organizational sustainability.
Here are some notable achievements:

- I managed the nationwide application process for over 400 positions across more than 16

distinct band camps for two consecutive years. Through streamlining the administrative procedures and implementing a communication strategy, I significantly reduced the workload and transformed the results of user experience evaluations from highly unfavorable to exceedingly positive.

- Revamped and restructured the onboarding training program for leadership assessments within Sweden's national organization for girl rock camps, Popkollo, spanning across 16 regional camp organizations.

Educational Consultant
Make Equal

Jan 2017 - Jan 2019 (2 years 1 month)

In a co-op project between the organizations Popkollo and Make Equal, as part of the project "Make Equal Music" I participated as a process leader and lecture holder within the series of workshops held in two Swedish pilot regions. This entailed:

Conducting training sessions in DEI for all municipal employees who interact with young individuals in various creative activities.

Delivering lectures on LGBTQIA+ topics and talked about accessibility from a norm-conscious perspective. Important skills I developed throughout my years holding workshops in subjects that can be abstract and really difficult to grasp if you never before had to think in terms of privilege and power, is how to adapt to the audience. As a workshop holder, I need to be prepared and adjust my language and methods completely in the spur of the moment. Usually the group is diverse in previous knowledge and lived experience, and this can be really challenging to make the level inclusive for everyone. Since Ive been doing this on a regular basis for the past 15 years, I picked up a lot of skills and strategies, that I find very transferable skills to have as a developer.

Metadata Editor
Magine AB, Enginering department

Jan 2017 - Jun 2017 (6 months)

Worked in a small metadata-team responsible for review and editing (mostly) image data for all TV channels within the company's web-based streaming service by searching through image databases,

finding suitable images for all programs, editing the images in Photoshop, and updating the TV schedule with relevant images for each program. Checking the rights for the metadata be up to date.

Project Manager
Popkollo Botkyrka

Feb 2015 - Oct 2015 (9 months)

I successfully led the reorganization of Popkollo Botkyrka into a district association, which involved migrating the membership system and providing support to volunteers in the newly established associations, fostering a sense of ownership and dedication. I also managed legal document

administration throughout the reorganization process. The project's timely completion played a pivotal role in securing a substantial, long-term contribution from the county council. This grant facilitates the employment of an additional coordinator at 50% capacity and enables the provision of year-round music activities for girls and transgender youth in the suburbs of Stockholm on a substantial basis.

Educational Consultant

Popkollo

Jan 2013 - Sep 2015 (2 years 9 months)

Workshop Facilitation and Methodology Dissemination

Head Of Educational Material

Accessibility evaluations and compliance manager

* Consistently organized comprehensive workshops for camp leaders and organizations, offering valuable insights into the refined and progressive methods of Popkollo.

Educational Material Translation and Global Impact

* Translated the complete educational materials from Swedish to English, enabling the widespread dissemination of these methods across numerous EU countries and international meetups.

International Expertise Sharing

* Seized the distinctive opportunity to impart expertise by delivering training to organizations in Denmark, Norway, and at international gatherings. This highlighted the adaptable and universally applicable nature of the program's methodologies.

Project manager and coordinator

RFSL

Jan 2014 - Oct 2014 (10 months)

The Swedish Federation for Lesbian, Gay, Bisexual, Transgender, Queer and Intersex Rights, is a non-profit organization founded in 1950. RFSL strives to create an equal world where all LGBTQI people's human rights are respected and no one is left behind.

My role as administrator at the national office at the department for HIV-prevention was mainly about being a support for the boards of the RFSL-departements located around Sweden and provide them with accurate education and material for them to run the department and the activities they aimed for complete throughout the year.

Education

Technigo

2023 - 2023

A 24-week (Feb 2023 - June 2023) fast-paced remote Boot Camp, focusing on JavaScript (ES6), React,

HTML5, CSS and server-side programming with Node.js, with weekly projects covering everything from the basics of programming to structuring web projects using the latest technology. Agile methodology is applied at the core through weekly sprint planning, check-ins, demos and reflections. Mob-programming and pair-programming made up a significant part of the course.

Chas Academy
Fullstack developer, Information Technology
Aug 2022 - Nov 2022
Before joining the Technigo Bootcamp I studied to become a Fullstack Developer at Chas Academy (YH-education). I finnished the first 5 month before going on parental leave. When coming back I decided I wanted to accelerate my learning and combine my gained knowledge from self-studies with a 22-week Frontend Bootcamp instead.
Completed courses: HTML/CSS, Agile Project methods, Javascript.
